COVID-19 Regulation

PRE-DEPARTURE REQUIREMENTS TO ENTER INDONESIA

Health protocols for both Indonesian and foreign travelers entering the country. They will need to comply with the following requirements before traveling:

1. Foreign visitor must be fully vaccinated before entering Indonesia and must show their vaccination certificate to immigration officials upon arrival;

2. Indonesia citizens are still permitted to enter the country without being fully vaccinated but will be vaccinated upon arrival — this is compulsory;

3. In addition to a valid visa, the foreign traveler must present a PCR test result stating that they are free of COVID-19, taken within a minimum of 48 hours from the time of departure;

4. Foreigner travelers must have health insurance (coverage of at least US$25,000) and can cover the needs for COVID-19 treatment; and

5. They must also fill out the electronic Health Alert Card (e-HAC) through the **PeduliLindungi** application, which can be downloaded for free in the Google Play Store or the App Store.

6. Foreigners already in Indonesia who wish to travel domestically are required to be vaccinated (first dose) through the Indonesian government-initiated vaccination program.

7. **Free Quarantine for foreign travelers**
   - If the foreign traveler is double vaccinated or has received a booster jab, then they **do not require quarantine.**
   - If the foreign traveler has only received one dose of vaccination, they must quarantine for 5 x 24hrs, and undertake a second PCR test on the 4th day of quarantine.
   - The quarantine hotel and PCR tests will be at the expense of the foreign traveler. If the result is positive, the traveler will be referred to a COVID-19 hospital – where costs will be borne by the foreign traveler.

   NOTE: You can find the latest information through the airline services you use to enter Indonesia or through your embassy's website in Indonesia.
